

Unit 2. Our environment

Introduction. Agree or disagree. Justify your opinion.

1. I believe that the environment is the number one issue facing the world today.
2. The developed world is solely responsible for finding a solution to global warming.
3. There is no point doing anything to help the environment until everybody else does something first.
4. There is no such thing as global warming; it's all a conspiracy theory designed to bring about a world government.
