Video '10 Mind blowing new technologies'

Task: *Watch a video*: https://www.youtube.com/watch?v=7vQznLKEfBs
Give a detailed characterization of the following technologies, and answer the questions:

artificial intelligence
Why do SIRI and ALEXA keep on getting more intelligent?
What spheres do robots help people now?
What will they do in future?

brain computer interfaces
What is the technology about?
How does it help humans to compete with super intelligent robots?
How can it help people with depression and addiction?

3d printing
What is supposed to be a kind of old school and a cutting edge?
Explain, why it is possible to solve the problem of homelessness with this technology.

living robots
How can they revolutionize medicine?
What makes these robots different from 'traditional' robots and animals?

augmented reality
Why is the technology compared to a game *Pokemon go*?
What effects do AR glasses or contact lenses have?
What other things could AR bring to people soon?

tactile virtual reality
What is *haptic feedback*?
What does VR experience let you feel?
What is the technology being tested for?

self-driving vehicles
What is *level 5 automation*?
Assess the idea of fleets of self-driving vehicles and drone taxis on the roads.

hyperloop
Due to what will it be possible to travel at hypersonic speeds?

hydrogen power
Why do companies produce few cars that run on hydrogen?
Do you agree that hydrogen could be the power of the future?

energy-storing bricks
Do you think, energy-storing bricks are a technology of the near future?

quantum computing
Why does it promise to revolutionize computers in a way that's hard to fathom?
What could quantum computers mean?
